## Microsoft Windows 木葉村搞笑版

指導教授:旗木卡卡西

專題成員:漩渦鳴人、宇智波佐助、春野櫻

開發工具:GCC、Borland C++ Builder

測試環境: Linux Red Hat 5.0

## 一、簡介:

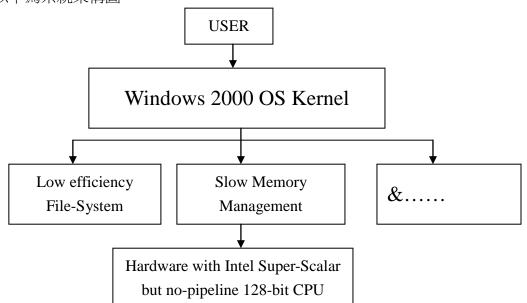

基於系統穩定的想法,我們要設計一套完美的 Windows 作業系統,需要結合 Windows 在使用上的便利性與 UNIX 系統高穩定的特性......

. . . . . . .

.....

. . . . . . . . .

## 以下爲系統架構圖:

## System is busy The system is busy waiting for the close program dialog box to be displayed. You can wait and see if it appears, or you can restart your computer. \* Press any key to return to Windows and wait. \* Press CTRL+RLT-DEL again to restart your computer. You will lose all information in all programs that are running.
